

Your inner child called

Growing up is important. Occasionally. The rest of the time, you've got wakes to chase, turns to tighten and water to throw in entirely the wrong direction. Fortunately, the JetBlaster PRO is every bit as enthusiastic about those things as you are.

There's a certain satisfaction that comes from making something difficult look effortless. The naked-style handlebars, lightweight hull and foot chocks deliver the kind of control that rewards commitment, confidence and the occasional urge to show off.

The customisable 4.3" display with Drive Control modes puts your personal command centre right at your fingertips, while electric trim lets you fine-tune the ride on the fly. Handy, because style points don't award themselves.

- 3-cylinder, 4-stroke TR-1 High Output Yamaha Marine Engine
- 144 mm high-pressure pump
- Electric trim system
- Foot chocks support advanced moves
- NanoXcel2 hull
- Easy-access multi-function 4.3" colour display with Drive Control
- Revolutionary RiDE® system for intuitive control

Making waves since day one

The difference between riding across the water and playing with it is attitude. Lightweight, agile and packed with personality, the JetBlaster PRO rewards quick thinking, fast hands and riders who prefer it when the wind picks up, the spray starts flying and the revs kick up.

Turns become tighter. Wakes become launch ramps. Flat water becomes a blank canvas for showing off. The wide handlebars, foot chocks and agile riding position put you firmly in control, while the retro styling ensures you're looking good while causing trouble.

The customisable 4.3" display, Drive Control modes and electric trim help keep everything perfectly dialled in, leaving you free to focus on the important things. Like turning every wake, turn and stretch of open water into your personal playground.

Electric trim

The difference between "that was fun" and "let's do that again" is often in the details. Electric trim lets you adjust the craft's running attitude on the fly, helping you dial in the ride for sharper handling, bigger confidence and increasingly ambitious behaviour.

NanoXcel2 hull

Strong, rigid and impressively lightweight, the NanoXcel2® hull helps the JetBlaster PRO react quicker than your friends can say, "Do that again." Agile handling and reduced weight combine to create a ride that's always eager when the water starts looking interesting.

Foot chocks

Some people ride the water. Others attack it. Foot chocks help keep you locked in during aggressive turns, quick transitions and freestyle manoeuvres, giving you the confidence to push harder, turn sharper and generally make a bigger spectacle.

RiDE® (Reverse with Intuitive Deceleration Electronics) technology

Forward, reverse and deceleration are controlled directly from the handlebars, helping keep low-speed manoeuvres smooth and intuitive. Particularly useful when you've spent the previous ten minutes proving that restraint was never really the plan.

Naked-style handlebars

The naked-style handlebar setup puts you right at the centre of the action. Wide bars and round grips create a direct connection between rider and watercraft that's about as subtle as a splash in the face.

TR-1® High Output 1,049cc, 3-cylinder engine

Some riders like to take it easy. The JetBlaster PRO respectfully declines. Its High Output engine delivers the kind of punch that transforms calm water into a playground and ordinary afternoons into stories that begin with, "You should've seen this."

Engine

Engine type	3-cylinder, 4-stroke TR-1 High Output Yamaha Marine Engine
Displacement	1049 cc
Pump Type	144 mm high pressure pump
Fuel	Unleaded Regular Gasoline
Fuel capacity	50 l
Oil capacity	3.4 l

Dimensions

Length	3 m
Width	1.14 m
Height	1.18 m
Dry weight	244 kg

Features

Storage Capacity	5.5 l
Rider capacity	1-2
Glove Box	Watertight
T.D.E	Yes
Seat	1-piece
Deck Mats	Custom cut
