

100hp

Smarter tech. Smoother days. Better stories.

From lively watersports sessions to low-effort cruising, the 100hp is designed to make every outing feel smoother, calmer, and more rewarding. It starts cleanly, runs quietly, and responds instantly — leaving you free to enjoy a latte and the sun's rays.

Its performance comes from Yamaha's marine-first approach: Purpose-built engine architecture, efficient airflow management and intelligent micro-computer monitoring that keeps every parameter optimised. It's reliability that's anything but boring.

Thanks to Yamaha's clean-burn wizardry, you can unleash all the grunt you fancy while leaving fewer emissions behind — because fun on the water shouldn't require a moral dilemma or a stern chat with Mother Nature.

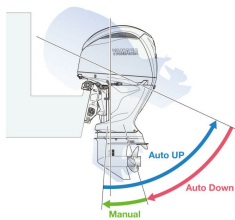

- Sleek design

Light on weight. Heavy on GO!

Clever engineering makes this engine feel instantly responsive, with its refined SOHC 16-valve layout delivering crisp acceleration and relaxed cruising while sipping fuel like it's saving up for something. The reduced weight sharpens handling and brings new energy to boats that love a bit of everything — exploring, towing, or just taking the day as it comes.

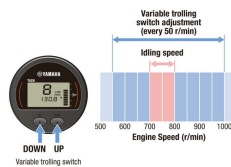

Beneath the sleek cowling, advanced intake and exhaust tuning works hand-in-hand with multi-point EFI to produce clean, predictable power across the rev range. Meanwhile, PrimeStart™ ensures drama-free ignition, and the high-output alternator keeps the onboard essentials humming smoothly. And with Digital Network Gauge compatibility, you're always in command, backed by crystal-clear data that eliminates any "oops" moments.

Add in wide range power trim and tilt for precise boat attitude and the 100hp becomes the easygoing first mate every boater wishes they'd met sooner. Watersports, cruising, pottering — it handles it all without breaking a sweat.

Tilt limiter

A quiet guardian against expensive mistakes. The tilt limiter prevents over-tilting, helping protect your cowling and transom from accidental contact. You may never notice it — and that's exactly the point.

08_Visible trolling switch

Variable trolling control

Slow it right down — precisely. Variable trolling control lets you fine-tune engine speed in 50 rpm increments, making relaxed trolling effortless and controlled. Perfect for fishing days where patience is rewarded... eventually.

Electronic Fuel Injection (EFI)

Fuel delivered with clockwork precision. Yamaha's EFI system ensures smooth starts, clean acceleration and excellent efficiency, giving you reliable performance without fuss — and fewer reasons to visit the fuel dock.

Y-COP remote immobiliser with smart key

Your outboard, on your terms. Yamaha Customer Outboard Protection immobilises the engine at the press of a button, adding discreet security without adding hassle. Think car-style convenience, boat-level peace of mind.

Fresh water flushing system

Salt out. Life extended. Simply connect a hose to the front-mounted port and flush without running the engine. Less corrosion, easier maintenance and more time doing literally anything else.

Digital network gauges

Link the engine to Yamaha's digital network to unlock detailed information on RPM, fuel flow, trim, hours and more, giving you clear feedback to drive harder, cruise smarter and save fuel.

Dimensions

Overall length	803 mm
Overall width	488 mm
Steering angle	35 degrees each direction
Overall height	L: 1622 mm, X: 1749 mm
Engine transom height	L: 516 mm, X: 643 mm
Dry weight	162 kg - 166 kg

Engine

Ignition / advance system	TCI
Engine oil capacity	3.2 L / 3.0 L (with / without oil filter replacement)
Compression ratio	10.0 : 1
Alternator	35 A (battery charging: 21 A)
Lubrication system	Wet sump
Bore x stroke	81.0 × 88.9 mm
Engine type	16-Valve, SOHC, In-line 4 cylinders
Displacement	1832 cm ³
Fuel induction system	Fuel injection
