

115hp

Where smart engineering meets serious fun.

Whether you're carving wakes, exploring quiet coves, or spending a lazy afternoon letting the tide do the work, the 115hp makes the whole experience feel easier, fresher and more responsive. It's the 'just right' engine for boaters who want everything — power, efficiency and that unmistakable Yamaha refinement that draws every eye at the dock.

Yamaha's marine-first engineering shows up everywhere: Air that flows exactly where it should, micro-brains constantly checking the maths, ignition that fires cleaner than your best punchline, and components balanced like they're auditioning for a ballet. You notice it in the smoothness, appreciate it in the hush, and rely on it when the weather starts asking difficult questions.

And while it's fully capable of unleashing a grin at full throttle, it remains clean, considerate and efficient — proof that environmental responsibility and genuine performance make excellent boat-mates.

- Sleek design

Measure better in miles.

This advanced 1.8 L DOHC, 16-valve powerhouse blends clever engineering with a feathery footprint, giving you clean, quiet performance with the unmistakable nip of serious torque. Whether you're chasing early-morning glass or towing the usual suspects on skis, it responds instantly and confidently — like an engine that knows it's the smartest one in the room.

Of course, brains matter too. That's why the 115hp syncs seamlessly with Yamaha's digital network system and puts wide range power trim and tilt at your fingertips. Everything works together with that typical Yamaha calmness — controlled, refined, and absolutely reliable — even when you've decided to let rip.

And because our EFI and combustion systems are engineered for supreme efficiency, this engine delivers every ounce of performance without fuss, drama, or waste to your wallet. Smooth? Very. Dependable? Completely. Overachieving? Constantly.

Compact, lightweight design

A high power-to-weight ratio in a compact footprint makes re-power projects simple, adding serious performance and modern efficiency without overwhelming an existing transom or upsetting balance.

High-power 35 Amp alternator

A robust three-phase 35 Amp alternator keeps batteries topped up and electronics happy, even at trolling speeds, so power for starts, sounders, and stereo is always in reserve.

Remote control model (ET)

Variable trolling control

Slow it right down — precisely. Variable trolling control lets you fine-tune engine speed in 50 rpm increments, making relaxed trolling effortless and controlled. Perfect for fishing days where patience is rewarded... eventually.

Y-COP remote immobiliser with smart key

Your outboard, on your terms. Yamaha Customer Outboard Protection immobilises the engine at the press of a button, adding discreet security without adding hassle. Think car-style convenience, boat-level peace of mind.

Electronic Fuel Injection (EFI)

Fuel delivered with clockwork precision. Yamaha's EFI system ensures smooth starts, clean acceleration and excellent efficiency, giving you reliable performance without fuss — and fewer reasons to visit the fuel dock.

Tilt limiter

A quiet guardian against expensive mistakes. The tilt limiter prevents over-tilting, helping protect your cowling and transom from accidental contact. You may never notice it — and that's exactly the point.

Dimensions

Overall length	EHT: 1554 mm, ET:826 mm
Overall width	524 mm
Steering angle	35 degrees each direction
Overall height	L: 1629 mm, X: 1756 mm
Engine transom height	L: 516 mm, X: 643 mm
Dry weight	175 kg - 185 kg

Engine

Ignition / advance system	TCI
Engine oil capacity	3.2 L / 3.0 L (with / without oil filter replacement)
Compression ratio	10.0 : 1
Alternator	35 A (battery charging: 27 A)
Lubrication system	Wet sump
Bore x stroke	81.0 × 88.9 mm
Engine type	16-Valve, DOHC, In-line 4 cylinders
Displacement	1832 cm ³
Fuel induction system	Fuel injection
