

130hp

Versatility that says "look at me"

The 130hp brings genuine do-anything energy to every outing. It's the perfect partner for days spent cruising, towing, exploring, or working — engineered to sharpen handling, strong enough to move serious weight, and refined enough to keep everyone onboard smiling rather than bracing for impact.

Behind the scenes, Yamaha's latest marine technologies work constantly in your favour: The micro-computer controls adjust everything from fuel mixture to combustion efficiency, and a clever intake and exhaust layout keeps performance smooth, predictable, and brilliantly responsive. It's the ultimate formula for fuss free fun.

And with Yamaha's clean-burn smarts handling the eco-side of things, you get full-bodied punch without the guilt. Proof that power, pleasure and responsibility can absolutely work together without arguing over who gets the helm.

- Sleek design

Unfair advantage, now in compact form.

Its innovative design means more freedom on the water: Quicker acceleration, livelier handling and a hull that suddenly feels younger, fitter and far more fun than you remembered. And because it's one of the cleanest, smoothest four-strokes you can run, you enjoy all that performance without any of the guilt.

Under the cowling, a 1.8 L, 16-valve DOHC four-stroke awaits, blending compact engineering with an array of practical tech that makes your on-the-water life easier. Optional digital network system compatibility, plus the wide range power trim and tilt with tilt limiter work together to give you control, confidence, and convenience in equal measure.

The result? An engine that transforms everything it touches. Whether you're hauling a workboat, pushing into a headwind or simply stretching your legs on open water, the 130hp delivers smooth strength that feels effortless. Dependable. Playful. Remarkably capable.

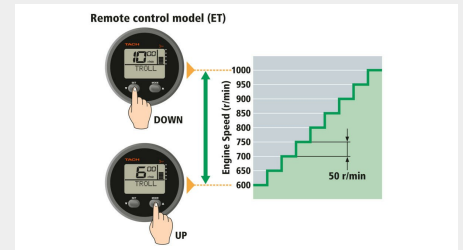

Electronic Fuel Injection (EFI)

Fuel delivered with clockwork precision. Yamaha's EFI system ensures smooth starts, clean acceleration and excellent efficiency, giving you reliable performance without fuss — and fewer reasons to visit the fuel dock.

Y-COP remote immobiliser with smart key

Your outboard, on your terms. Yamaha Customer Outboard Protection immobilises the engine at the press of a button, adding discreet security without adding hassle. Think car-style convenience, boat-level peace of mind.

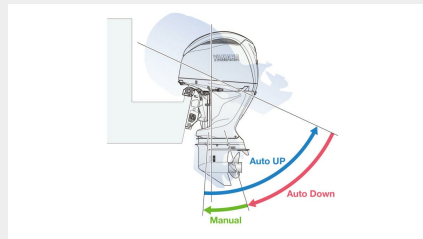

Variable trolling control

Slow it right down — precisely. Variable trolling control lets you fine-tune engine speed in 50 rpm increments, making relaxed trolling effortless and controlled. Perfect for fishing days where patience is rewarded... eventually.

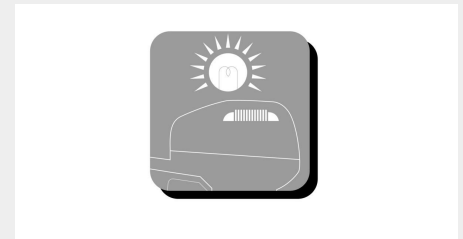

Fresh water flushing system

Salt out. Life extended. Simply connect a hose to the front-mounted port and flush without running the engine. Less corrosion, easier maintenance and more time doing literally anything else.

Tilt limiter

A quiet guardian against expensive mistakes. The tilt limiter prevents over-tilting, helping protect your cowl and transom from accidental contact. You may never notice it — and that's exactly the point.

High-power 35 Amp alternator

A robust three-phase 35 Amp alternator keeps batteries topped up and electronics happy, even at trolling speeds, so power for starts, sounders, and stereo is always in reserve.

Dimensions

Overall length	826 mm
Overall width	524 mm
Steering angle	35 degrees each direction
Overall height	L: 1629 mm, X: 1756 mm
Engine transom height	L: 516 mm, X: 643 mm
Dry weight	176 kg - 180 kg

Engine

Ignition / advance system	TCI
Engine oil capacity	3.2 L / 3.0 L (with / without oil filter replacement)
Compression ratio	10.0 : 1
Alternator	35 A (battery charging: 27 A)
Lubrication system	Wet sump
Bore x stroke	81.0 × 88.9 mm
Engine type	16-Valve, DOHC, In-line 4 cylinders
Displacement	1832 cm ³
Fuel induction system	Fuel injection
