

25hp

Weekend power, weekday manners.

Some engines just get it. Effortless torque, crisp throttle, and the kind of refinement that makes you look like the smoothest sailor in the marina. The 25hp is all about quiet confidence and shared smiles.

From a lazy drift with friends to a full-tilt run across open water, it never misses a beat. It's power that plays nicely with others, strong, steady, and just refined enough to make every trip feel first class.

When you pull back into the marina, this is the engine that earns you a few glances, not because it's loud, but because it's effortlessly Yamaha. Smooth, capable, and ready for another day out where the only thing that matters is good company and open water.

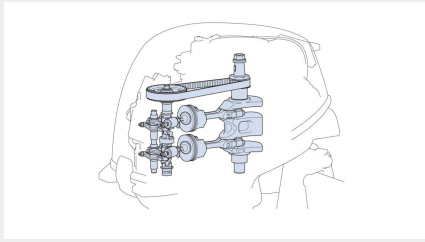

- Sleek design

Big power for bigger weekends.

This isn't just power, it's refined performance with a knowing grin. Light enough to lift your mood, strong enough to haul the whole crew, and smooth enough that your coffee stays put. Yamaha's cutting-edge EFI system ensures an easy, instant start every time, while the intelligent design gives you that "big engine" feel without the big engine weight.

Whether you're cruising out for lunch, towing your resident watersports fanatic, or heading home just as the sun dips low, the 25hp stays calm, quiet, and perfectly balanced. Digital Network Gauge compatibility keeps you connected and in control, while Yamaha's signature engineering means you can trust it to start, run, and perform beautifully; no drama, no surprises.

The 25hp blends strength with sophistication. It's got the power to play, the smoothness to relax, and the style to turn heads at the dock. Easy to start, effortless to live with, and powerful enough to make even the longest day on the water feel too short.

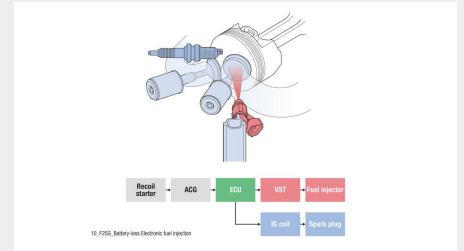

Special power-to-weight performance

Strong enough to surprise you, light enough to carry. This perfectly balanced design delivers all the muscle of a big engine without weighing down the fun.

One-piece top cowling design

Form meets function in a single piece. The sculpted cowling is smart, sturdy and unmistakably Yamaha, with a watertight fit that looks sharp and keeps your engine even sharper.

Easy starting, security and VTS

Start it like a car, trust it like a friend. Between PrimeStart™, battery-less EFI, VTS speed control and Y-COP security, it's convenience with confidence built in.

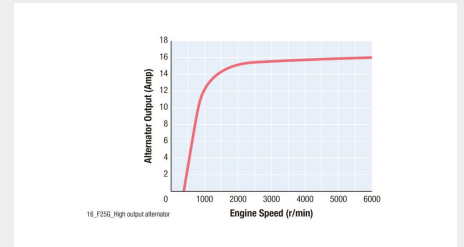

Compatible with Yamaha's Digital Network Gauges

Information meets intuition. Hook up to Yamaha's digital network system and get real-time data at a glance; speed, efficiency, performance; all wrapped in smooth, stress-free control.

Large multi-function tiller handle option

Because two hands are overrated. This larger tiller brings throttle, gear and trim within easy reach, keeping every control right where it should be; at your fingertips.

High-output alternator keeps the power coming

Never run out of juice mid-journey. The high-output alternator keeps power flowing for starts, lights and all your onboard extras. Because nothing ruins a sunset faster than a dead battery.

Dimensions

Overall length	MH, WH, WHP: 1130 mm, WHT, WHD: 1129 mm
Overall width	378 mm
Steering angle	45 degrees each direction
Overall height	S: 1106 mm, L: 1233 mm, X: 1320 mm
Engine transom height	S: 424 mm, S (ET, WT, WHT): 429 mm, L: 551 mm, L (ET, WT, WHT, WHD): 553 mm, X: 640 mm
Dry weight	56 kg - 70 kg

Engine

Ignition / advance system	TCI
Engine oil capacity	1.1 L / 1.0 L (with / without oil filter replacement)
Compression ratio	9.1 : 1
Alternator	16 A
Lubrication system	Wet sump
Bore x stroke	65.0 × 65.1 mm
Engine type	SOHC, In-line 2 cylinders
Displacement	432 cm ³
Fuel induction system	Fuel injection
