

Your perfect plus-one for the water

It's the engine that says, "I've got this," even when the weather says otherwise. Starts easy, runs smoother than a flat sea at sunrise, and hums like it's genuinely happy to be here.

This is an engine for the dreamers who see a ripple and imagine a route; for the weekend explorers who just want to be out there, engine humming, mind clear. Every feature is purpose built for boating pleasure.

Yamaha's reliability is legendary, but the 5hp adds something else; personality. It's adventurous, confident, and always game for one more run around the bay. Reliable, quiet, and ready to go — the 5hp is your ticket to turning ordinary days into spontaneous adventures.

- Sleek design

Your portable power play.

The 5hp doesn't ask for attention, it earns it. With Yamaha's famously smooth 4-stroke power, it's efficient, quiet, and gloriously easy to handle. It's light enough to lift without a gym membership and smart enough to make tight turns feel like second nature.

Its built-in 1.1 L fuel tank keeps the deck clear for what really matters; your gear, your snacks, your playlist. And when adventure calls for a little more distance? Just plug in a remote tank and keep the story going. Add the three-position storage system for no leaks, zero drama, and it's officially the neat freak of the marina.

Clean lines, crisp starts, and fuel economy that makes you feel like you've hacked physics; the 5hp isn't just about getting places. It's about doing it with a grin, a glide, and zero fuss.

Dressed to impress.

Looking this good shouldn't be effortless, but it is. The sleek grey cowling and bold graphics bring a touch of Yamaha attitude to every outing. It's sharp, modern, and made for fun, the perfect match for your next day on the water.

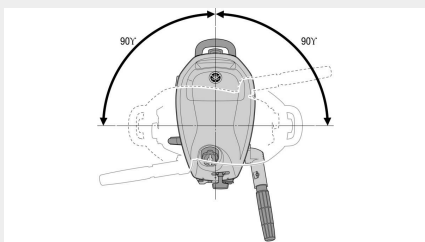

Grab and go!

The compact shape and large, soft-grip handle make it easy to lift, load, and launch. Whether you're strolling to the slipway or hopping between boats, this little engine carries like a dream, because Yamaha knows adventures should start smoothly.

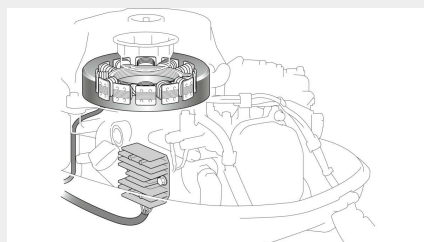

Zero spills, zero stress.

Take it from the car to the dock without a single drop of mess. Yamaha's clever breather system means you can store it on its front or either side; no oil leaks, no worries. Just grab, go, and relax knowing your boat, boot, and deck stay spotless.

Smooth turns, tight spots; you've got this!

Docking, weaving, drifting...whatever the day brings, steering feels effortless with simple friction control and full 90° turns to either side. Adjust your throttle trim to match your pace, and enjoy that steady, balanced ride Yamaha's famous for, even when you're cruising at pace.

Light up the night.

When the sun dips but you're not done, the optional lighting coil keeps the good times glowing. A reliable 12 V 6 A power supply lets you run lights, charge devices, or stay out fishing after dark, because the best stories don't always happen in daylight.

Fuel freedom, built in.

For quick trips, the 1.1 L built-in tank keeps things light and clutter-free, so more room for your tackle box or cooler. Got bigger plans? Just twist the two-way tap and plug in a remote tank to double your range. Simple, smart, and ready for wherever the day takes you.

Dimensions

Overall length	750 mm
Overall width	403 mm
Steering angle	90 degrees each direction
Overall height	S: 1039 mm, L: 1166 mm
Engine transom height	S: 435 mm, L: 562 mm
Dry weight	S: 27 kg, L: 28 kg

Engine

Ignition / advance system	CDI
Engine oil capacity	0.6 L
Compression ratio	8.9 : 1
Alternator	6 A with optional regulator
Lubrication system	Wet sump
Bore x stroke	62.0 × 46.0 mm
Engine type	OHV, 1-cylinder
Displacement	139 cm ³
Fuel induction system	1 carburetor
