

6hp

Bigger ambitions, bigger adventures.

The 6hp is made for explorers who love the rhythm of the water; that quiet push from the stern, the salt on the air, the gentle wake behind you. Some engines shout. The 6hp just shows up and delivers. Smooth starts, precise steering, and that unmistakable Yamaha calm.

It's engineered for reliability, but it's designed for experience. From lazy river days to full-tilt coastal exploring, it handles like it's reading your mind. Low noise, low fuel use, zero stress; just pure, unfiltered fun on the water.

It's the engine equivalent of a well-tailored suit: looks sharp, performs flawlessly, and makes you wonder how you ever settled for less.

- Sleek design

Big on confidence. Small in size.

There's something satisfyingly grown-up about the 6hp. You pull the cord, it purrs like it's been waiting for you all week. Built for boaters who want to roam further without wrestling with bulk, it's proof that you can pack muscle and manners into the same cowl.

A built-in fuel tank keeps the deck clear, while Yamaha's clever three-position storage system means no messy oil leaks (or the associated in-car arguments) when you pack it away. The carry handle's robust, the start-up's effortless, and the whole design whispers "refinement", right before it growls into action...

Whether you're cruising the coastline, exploring quiet inlets, or keeping it handy as an auxiliary, the 6hp is always game for adventure. Reliable, economical, and effortlessly stylish; it's Yamaha freedom, with a little extra muscle.

Dressed to impress.

Looking this good shouldn't be effortless, but it is. The sleek grey cowling and bold graphics bring a touch of Yamaha attitude to every outing. It's sharp, modern, and made for fun, the perfect match for your next day on the water.

Grab and go!

The compact shape and large, soft-grip handle make it easy to lift, load, and launch. Whether you're strolling to the slipway or hopping between boats, this little engine carries like a dream, because Yamaha knows adventures should start smoothly.

Zero spills, zero stress.

Take it from the car to the dock without a single drop of mess. Yamaha's clever breather system means you can store the 6hp on its front or either side; no oil leaks, no worries. Just grab, go, and relax knowing your boat, boot, and deck stay spotless.

Smooth turns, tight spots; you've got this!

Docking, weaving, drifting...whatever the day brings, steering feels effortless with simple friction control and full 90° turns to either side. Adjust your throttle trim to match your pace, and enjoy that steady, balanced ride Yamaha's famous for, even when you're cruising at pace.

Light up the night.

When the sun dips but you're not done, the optional lighting coil keeps the good times glowing. A reliable 12 V 6 A power supply lets you run lights, charge devices, or stay out fishing after dark, because the best stories don't always happen in daylight.

Fuel freedom, built in.

For quick trips, the 1.1 L built-in tank keeps things light and clutter-free, so more room for your tackle box or cooler. Got bigger plans? Just twist the two-way tap and plug in a remote tank to double your range. Simple, smart, and ready for wherever the day takes you.

Dimensions

Overall length	750 mm
Overall width	403 mm
Steering angle	90 degrees each direction
Overall height	S: 1039 mm, L: 1166 mm
Engine transom height	S: 435 mm, L: 562 mm
Dry weight	S: 27 kg, L: 28 kg

Engine

Ignition / advance system	CDI
Engine oil capacity	0.6 L
Compression ratio	8.9 : 1
Alternator	6 A with optional regulator
Lubrication system	Wet sump
Bore x stroke	62.0 × 46.0 mm
Engine type	OHV, 1-cylinder
Displacement	139 cm ³
Fuel induction system	1 carburetor
