

Your smooth operator.

Some engines shout for attention; this one just gets the job done while you keep a hand free to pop on your sunglasses. Smooth starts, soft hums and zero jolts, it's boating without needing to brace yourself.

It's the kind of reliability and precision handling that makes you look like a seasoned captain, even if it's only your first time out. Simple controls, steady thrust, and Yamaha's precision mean your passengers think you planned every move (even when you didn't!).

From going to breakfast becomes "just one more" lap of the bay, the clean-burn technology in this engine makes big memories, not a big impact on the environment.

- Sleek design

Small engine, big weekend energy.

The secret's in the balance; plenty of torque without needing the gym membership. Easy to handle and light enough to heft without the huffing, it's made for easy starts and calm cruising. Because the only thing that should make waves is you.

With Yamaha's famously smooth 4-stroke engineering, you'll glide across the water like it's freshly ironed. Low noise, low fuss, high satisfaction, and enough fuel efficiency to make your wallet feel like it's on holiday too.

Whether you're chasing fish or following the smell of something cooking to the marina bar, this engine keeps things effortless. No drama, no tantrums, just steady power and the confidence to stay out a little longer (and still look cool doing it).

Smart engine design

Power that feels smooth, not shouty. The intelligent twin-cylinder design delivers all the muscle you need, with the refinement you didn't know you could have. It's proof that quiet confidence travels fast.

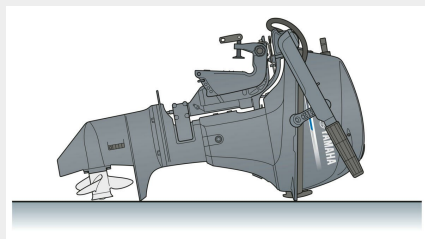

Advanced tiller handle design and controls

Easy comfort, clever control. The ergonomic handle sits exactly where you want it, so you steer, shift and smile all at once. Effortless handling means more time looking ahead and less time pretending you're not wrestling with the throttle.

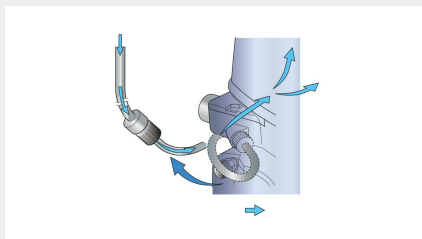

True portability

Every trip starts with a lift, so we made it a pleasure. A solid carry-handle and fold-back tiller make stowing it simple and stepping aboard smoother. Because your day on the water should start with excitement, not heavy lifting.

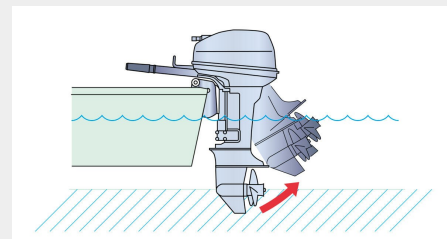

Rest pad for vertical storage position

Compact by design, considerate by nature. Whether it's upright on deck or tucked neatly in the garage, the special rest-pad and folding tiller make storage effortless. Perfect for keeping life (and the boat) clutter-free.

Fresh water flushing system

A quick rinse, a longer life. Simply connect a hose and let the clean water do its thing; no running the engine, no drama, no corrosion. It's like giving your outboard a spa day after a salty adventure.

Shallow water drive system

Close calls welcome. Cruise right up to the shallows without a second thought — this system protects your propeller so you can chase the best lunch spots or hidden picnic coves without flinching at the depth sounder.

Dimensions

Overall length	MH: 983 mm, E: 557 mm
Overall width	MH: 373 mm, E: 333 mm
Steering angle	43 degrees each direction
Overall height	S: 1008 mm, L: 1135 mm
Engine transom height	S: 431 mm, L: 558 mm
Dry weight	40 kg – 43 kg

Engine

Ignition / advance system	CDI
Engine oil capacity	0.8 L
Compression ratio	9.4 : 1
Alternator	6 A with Rectifier regulator
Lubrication system	Wet sump
Bore x stroke	56.0 × 43.0 mm
Engine type	SOHC, In-line 2 cylinders
Displacement	212 cm ³
Fuel induction system	1 carburetor
