

M20

Prowl like a panther.

Some call it luck, but you'll know better. Smooth, silent power keeps you right where the bite is, while everyone else wonders how you got there first.

It's precise, it's patient and it doesn't scare the locals. Every move feels effortless, every cast more confident; the water's yours to enjoy in peace.

When you're running this quietly, the only sound you'll hear is the splash of your next catch.

- Sleek design

Engage stealth mode.

Built for anglers who prefer action over noise, it glides you into the perfect spot with barely a ripple. The twist-on hand control tilts, extends and moves exactly how you want it to, giving you stealth-level accuracy on every approach.

The 12-volt motor delivers steady, efficient thrust, while fine steering tension and smooth depth control keep you locked on target. It's so quiet you'll start thinking of it less as an engine and more as a very obedient accomplice.

Compact, strong, capable of cutting through weed, and ridiculously easy to work with, it's the motor that gives you more time to fish and fewer reasons to talk about gear. And that's saying something.

One-hand stow

With a simple pull, lift or lower the motor into any of ten precise positions using the easy-access thumb release. One smooth action, total control, and no awkward juggling when it's time to move.

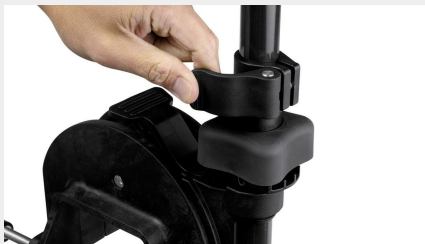

Twist-on hand control

Enjoy total control with the Tilt/Extend Tiller handle on the M26. It tilts up to 45° and extends up to 15 cm, so you can adjust your position and steering style with ease. The contoured grip feels natural in your hand, keeping comfort and precision perfectly in tune all day long.

Versatile steering tension control

Fine-tune your steering feel with the adjustable collar above the engine mount. Keep it loose for light, effortless turns or tighten it for more stability in rough conditions. It's responsive when you need freedom and steady when you need focus.

Quick lock cam depth adjuster

Set your depth quickly and securely with the quick lock cam depth adjuster. One smooth motion locks your prop exactly where you want it, so you can stay focused on the water, not the hardware.

Electric-Drive Technical specs	
Amp draw	42
Control	Tilt/Extend Tiller
Battery meter	Yes
Digital maximizer	Yes
Maximum thrust (kg)	20.4
Voltage	12
Shaft length	914 mm
Mount feature	One-hand Stow
Speeds (FWD/REV)	5 FWD/3 REV
